

**CANCER  
RESEARCH  
INSTITUTE®**

Cancer Research Institute supports scientist, laboratories and clinical research in immunology and cancer immunology at premier medical institutions throughout the United States.

- \$1 – You can help us provide cancer treatment information to a person battling the disease or to someone wanting to offer support and guidance to a loved one who is fighting cancer.
- \$5 – You can help pay for essential laboratory supplies researchers require to find new ways to treat, control, and prevent cancer.
- \$10 – You can help pay for storage of important tumor tissue samples given by a cancer patient; cancer researchers need these samples to help determine whether patients are likely to respond to immunotherapy or not.
