

Prader-Willi
SYNDROME ASSOCIATION (USA)
SAVING AND TRANSFORMING LIVES

PWSA | USA is an organization of individuals, families, and professionals working together to create a collaborative, participative community wherein individuals with PWS and their families have the resources and support they need to define, create, and live their best lives. Each year, PWSA | USA serves approximately 1,100 families across the United States.

With support from our volunteers and donors, we have created and expanded programs for parents of newly diagnosed children, deployed life-changing family support programs, and provided training and information to school professionals, residential providers, and healthcare providers from across the country. For example, in 2019 alone, PWSA | USA provided 392 hours of school support across a variety of topics, including food security, managing behavior, assistance with Individual Education Plans (IEPs), drafting support letters, and providing training to education professionals.

Each unit of activity (estimated at 3 hours of time) performed by PWSA | USA's Family Support team costs approximately \$400 to provide. Therefore, a gift of \$100 would provide 1 hour of training to education professionals.
